# ORGANIC BATTERY DAYS 2019

3 - 5 June 2019  
Friedrich Schiller University Jena  
Jena, Germany

## WELCOME NOTE

Dear friends and colleagues,

it is my great pleasure to invite you to the Organic Battery Days 2019, the only international conference in the emerging field of Organic Batteries.

This international three-day event brings together experts from science, research, politics, administration and industry to exchange knowledge and experience on the latest developments in the field of electrochemical energy storage based on organic active materials. It will cover the synthesis and characterization of materials as well as the study of the performance of these materials in electrochemical systems.

In order to put together an ambitious as well as varied scientific programme, we need your support! Therefore, I would like to cordially invite you to hand in your abstracts and I would be delighted about numerous submissions from your side!

I'm looking forward to seeing you in Jena!

Sincerely yours,

Prof. Dr. Ulrich S. Schubert  
Conference Chair
