CURRENT Launch
Thursday 25 June, 2020 - 12pm BST / 1pm CEST

New energy trade association set to take Europe’s power network to the next level

WHAT?
Next Thursday an important new trade association is being launched, representing ‘the new kids on the block’ of power network optimisation.

The new association is being founded by a group of leading energy technology companies, who collectively see a need for a strong, unified voice for businesses developing and supplying next-generation technologies - businesses who are set to take Europe’s power network to the next level, and significantly shape the energy industry’s future.

CURRENT’s vision is a European power network that is the recognised world leader in enabling decarbonisation, through the efficient use of innovative grid technology.

As Europe continues to lead the way in the energy transition, and the implementation of COP 21, the European Green Deal and Clean Energy Package continue at pace, a group who can join the conversation and offer game-changing solutions is more important than ever.

This launch is timely as important energy regulation is out for update in 2020, and CURRENT will share its recommendations.

WHO?
Key speakers:
- Luxembourg’s Minister for Energy, Claude Turmes
- European Commission, TBC
- Director for Copenhagen School of Energy Infrastructure, Tooraj Jamasb
- Member of European Parliament, Maria da Graça Carvalho
- Moderated by Siobhan Hall - EU Energy Policy Editor, Platts.

WHEN?
Thursday 25 June; 12pm BST / 1pm CEST
